EDUCATION

Methodist School, Dankuni| High School Education

March 2010 – March 2022

MCKV Institute of Engineering | B.Tech in Computer Science and Engineering (AIML)

August 2023 – May 2027

SKILLS SUMMARY

- **Languages:** Python, SQL, JAVA, HTML,CSS,JS
 - **Frameworks:** Pandas, NumPy, Scikit-Learn, Matplotlib, Pytorch
 - **Tools:** Excel, PowerPoint, Tableau, MySQL,
 - **Platforms:** Jupyter Notebook, Visual Studio Code, IntelliJ IDE
 - **Soft Skills:** Team Leadership, People Management, Excellent communication
-

WORK EXPERIENCE

Python Developer| YBI Foundation| [LINK](#)

June 2025 – July 2025

- Build a simple Twitter Sentimental Analysis project using dataset and deployed it using Streamlit
- Built a Logistic Regression model to classify sentiment on a dataset of 1.6 million tweets, achieving 77.8% accuracy.
- Executed natural language processing (NLP) pipelines including Porter Stemming, stop word filtering via NLTK, and TF-IDF feature extraction.

Data Engineer| Edunet Foundation| Virtual|[Link](#)

June 2025 – July 2025

- Developed a machine learning system to recommend optimal crops based on 7 soil and environmental features (Nitrogen, Phosphorous, Potassium, temperature, humidity, pH, and rainfall).
 - Built a predictive model using Python and Scikit-Learn to classify the optimal crop from 22 unique categories based on soil and climate metrics.
 - trained and compared multiple algorithms, ultimately utilizing a Random Forest Classifier to achieve over 98% accuracy.
 - Conducted exploratory data analysis (EDA) using Seaborn heatmaps to identify feature correlations and exported the final model via Pickle.
-

PROJECTS

Pattern Recognition in Text using Finite Automata | [Link](#) |

March 2025 – April 2025

- Developed a Python-based utility application that utilizes regular expressions and finite automata concepts to parse and extract target data from text.
- Implemented robust data validation algorithms to accurately identify email addresses, URLs, and Indian phone numbers.
- engineered data normalization features to handle edge cases, such as auto-correcting malformed URLs (e.g., converting commas to dots) and automatically appending "+91" country codes to phone numbers.
- Designed an intuitive Graphical User Interface (GUI) using Tkinter to facilitate easy user input and clearly display extraction results.

CERTIFICATES and Achievements

Data Science, ML,DL, NLP(Udemy) |[CERTIFICATE](#)

March 2025

- Mastered fundamental Python syntax, proficiently utilizing control flow, loops, functions, and data structures.
- Gained foundational and advanced knowledge across the full data science lifecycle, specializing in Machine Learning, Deep Learning (DL), and Natural Language Processing (NLP).

- **GDG MCKVIE PR and Outreach - lead**
- **Nurturing innovation MCKVIE – Finalist**
- **5 star in Python on Hackerrank**
